

FREQUENTLY ASKED QUESTIONS

Q: Is it possible to install Eco-Grip® on stairs?

A: Yes

Q: Is Eco-Grip® fire retardant?

A: Yes

Q: Can Eco-Grip® be used outdoors?

A: Yes, remember to seal the edges.

Q: Does Eco-Grip® shrink or get brittle over time?

A: No

Q: Does the color fade over time?

A: No

Q: Can larger sheets of Eco-Grip® be purchased?

A: No

Q: Why do I need a heat shield?

A: To protect Eco-Grip's® surface from burning when under a hot appliance.

Q: What is the life expectancy of the product?

A: 10 years or more depending on care.

Q: How does Eco-Grip® compare with other slip-resistant flooring?

A: Better slip resistance due to higher coefficient of friction, significant anti-fatigue and reduction of lower back pain properties, and safer for employees.

Q: Will mold grow on Eco-Grip®?

A: No

Q: Will Eco-Grip® show signs of wear in high traffic areas?

A: Eco-Grip® will show minor smoothing from traffic, however this will not inhibit its slip resistance and overall performance.

Q: How does the cost of Eco-Grip® compare with other flooring?

A: The installed cost is comparable to tile and poured floors. In addition, Eco-Grip® does not require annual re-grouting like tile.

Q: How does Eco-Grip® compare with other slip-resistant flooring?

A: Better slip resistance due to higher coefficient of friction, significant anti-fatigue and reduction of lower back pain properties, and safer for employees.
