

FOODSERVICE FLOORS

Industrial foodservice settings usually offer the greatest challenge for commercial flooring to withstand the daily challenges of heavy usage, and abnormal quantities of fats, greases, and chemicals on the floors. Daily operations of a manufacturing facility requires resilient flooring solution which will require to withstand heavy routine cleaning with commercial cleaning equipment and harsh chemicals. Food manufacturing facilities face identical challenges when deciding on commercial kitchen flooring options which work best and provide the most durable restaurant floors.

Rubber mats often create serious tripping hazards in fast paced commercial kitchen and food service production facilities.

Eco-Tek floors eliminate the need for such mats and therefore the cleaning of such.

Our specialty commercial flooring solutions can withstand rigorous conditions and a variety of loads, even forklift traffic.

The unique composition of our products provides a fire-rated, non-porous, mildew-resistant, easy to clean, reliable commercial foodservice flooring. Not many commercial kitchen flooring solutions offer same flexibility as Eco-Tek Floors.

Often commercial foodservice facilities are located in less than ideal environments. Our resilient, waterproof safety floors offer an outstanding protection to the subfloor substrates of the buildings, and therefore provide a value added feature by extending longevity of the building and avoiding costly floor repairs.

Eco-Tek Floors is the ideal commercial kitchen flooring solution that solves many problems faced by facility directors.

Installation of our commercial utility floor, will completely eliminate the need for repair, extra daily cleaning, and costly regular grout repair. We provide the most durable restaurant kitchen flooring options.

Above all, Eco-Tek floors do not require any waxing or stripping, which means less downtime.

If your commercial kitchen floors are not performing to your expectations, call us today to find out about how we can expand your kitchen flooring options.
